PROFESSIONAL SKILLS

Technical Leadership

Team Collaboration & Mentoring

Project Planning & Execution

Stakeholder Communication

Strategic Problem Solving

PROFESSIONAL SUMMARY

Senior Software AI Developer specializing in AI, AIoT, Industrial IoT, and enterprise software development. Experienced in designing, developing, and deploying scalable digital solutions, intelligent monitoring platforms, and automation systems across industrial, infrastructure, and smart technology sectors.

Strong background in technical leadership, full-stack development, cloud technologies, system architecture, and digital transformation. Proven ability to lead projects from concept to deployment, delivering innovative solutions that enhance operational efficiency, data-driven decision-making, and business performance.

PROFESSIONAL EXPERIENCE

Gadang Works Sdn Bhd / Senior Software AI Developer

September 2025 - PRESENT, Bukit Serdang, Seri Kembangan

Key Responsibilities

- Lead AI integration and software development initiatives for enterprise and industrial solutions.
- Design scalable system architectures for monitoring, analytics, and automation platforms.
- Develop full-stack applications integrating AI, IoT devices, cloud infrastructure, and databases.
- Collaborate with stakeholders to transform operational requirements into intelligent digital solutions.
- Manage deployment, testing, optimization, and lifecycle support of software systems.

Progressive Impact Corporation Berhad / Executive Software Developer

August 2022 - August 2025, Bukit Jelutong, Shah Alam

- Led the design and development of configurator software solutions for enterprise and industrial clients.
- Architected and developed real-time monitoring dashboards integrating PLCs, sensors, and cloud platforms.
- Designed UI/UX wireframes, system workflows, and user-centric web applications.
- Managed cloud deployment, VPS hosting, database architecture, and production environments.
- Led project delivery from requirements gathering through testing and deployment.

Micro Precision Machining Sdn Bhd / Junior Software Developer

October 2020 - July 2022, Bandar Teknologi, Kajang

- Developed IoT-enabled hardware and software solutions for industrial and commercial applications.
- Designed and implemented web-based monitoring systems and cloud-connected platforms.
- Integrated sensors, controllers, and communication technologies for real-time data acquisition.
- Conducted system testing, commissioning, troubleshooting, and performance optimization.
- Collaborated with multidisciplinary teams to deliver reliable automation.

TECHNICAL & INDUSTRIAL EXPERTISE

- **Industrial Systems:** Industrial IoT, AIIoT, PLC/sensor/controller integration, real-time data acquisition, monitoring and automation platforms
- **Software & Data:** PHP, JavaScript, HTML, CSS, MySQL, full-stack applications, database architecture, UI/UX and system workflows
- **Architecture & Delivery:** Cloud deployment, VPS hosting, system architecture, production environments, testing, commissioning, troubleshooting, optimization and lifecycle support
- **Leadership:** Technical leadership, requirements gathering, project planning, stakeholder communication and multidisciplinary collaboration

EDUCATION

Universiti Putra Malaysia/ Bachelor of Engineering, Computer & Communication System

September 2016 - September 2020, UPM, Serdang.
